

SNOWBOARD GROUPS 2016 ONWARDS

Following consultation with local snowsport schools in Europe and with national snowsports bodies we are introducing the following change of policy with effect from winter 2016.

Snowboarders and skiers cannot be mixed together in the same group.

For clarification this means that a snowboarder must be instructed and lead by a qualified snowboard instructor and a skier must be instructed and lead by a qualified ski instructor.

As an example - in practice this means that for a standard group of 40 children we will provide 4 instructors. If there are approximately 10 snowboarders and 30 skiers then we will provide 1 boarding instructor and three ski instructors.

Problems will arise where a school has a large group of skiers and only a couple of boarders. In the past we may have agreed the boarders could join a ski group and be lead by a ski instructor. This practice has now ceased.

It is therefore important that as a school / college that if you intend to have both skiers and snowboarders you arrange to get full concise groups for each discipline. Regretfully surcharges will apply if additional instructors are required. These could be significant at around £1200 per instructor per week.

A handwritten signature in black ink, appearing to read 'Nigel H. Reed', with a horizontal line underneath.
